***Allowable Subject Matter***

Claims 20-21 and 24-29 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's arguments filed 11-AUG-2004 are generally not persuasive. However, applicant's argument suggests that the temperature gradient, as instantly claimed, is not rendered obvious by the applied prior art. Upon further review, the examiner finds no motivation in the prior art to combine the teaching of lower extrusion temperature in for a uppermost layer with the instant limitations directed to the overall process speed and application of the lowermost layer at a higher temperature. Although, both high and low temperature extrusions are known in the art to increase substrate bonding and lower gel content, the application of these techniques in a temperature gradient as instantly claimed is not suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
